MANAGEMENT AND LEADERSHIP

Environmentally Preferable Products and Services

We aim to use steam cleaning rather than commercial cleaning products, but when we do use cleaning products, we use ones that are not harmful to children or pets. With each new client that does not recycle, we offer information on how they can start to recycle and which items go in what containers for pick up. We keep track of our clients that convert to recycling and plan on sending them an offer at the end of the year. We also distribute seed packets with our "Thank you for your business" cards.

Environmentally Preferable Purchasing

The majority of the products we purchase are from Green Works and are clearly marked green, biodegradable, non-toxic, and not tested on animals

WASTE

Recycling

We recycle and reuse containers including spray bottles and cleaning rags.

ENERGY

Energy Efficiency

With all of our cleanings that are scheduled during the day our policy is that all lights must be off unless they are being used by the homeowner or a person requesting services.

TRANSPORTATION

Efficient Business Travel

We carpool to job sites and aim to only buy gas every two weeks. The store where we purchase our inventory is within walking distance, so that helps us cut down a lot.

WATER

Water Conservation

When able, we collect rain water for our steaming and store it for later use rather than using our clients' running water. At the moment, we have three one-gallon bottles stored and are collecting rainwater in a 30-gallon container.
